

## California University of Management and Technology

CALMAT educates the leaders of tomorrow in the skills essential for success in today's global economy.

CALMAT offers convenient, flexible learning programs that combine traditional business administration and management training with state-of-the-art information technology tools! We designed our programs to maximize your learning potential by leveraging concepts across course offerings. For instance, while you learn how to start a business in entrepreneurship class, you also apply the latest e-commerce web design tools to prototype a website for that business. Our faculty members not only hold advanced degrees in their fields, but also have a wealth of industry experience that allows them to connect management theory with practical applications. Students receive innovative and relevant instruction that they will be able to apply in the real world.

CALMAT programs are specifically designed for working professionals who wish to achieve academic excellence in the most efficient and effective way. We are proud to offer numerous international programs that engage and educate students worldwide.

**Apply today and accelerate your career with a degree from CALMAT.**
